

Implementation Drivers Assessment for the Triple P System of Interventions

Implementation and Scale-up Components

The Implementation Capacity for Triple P project team has developed a measure of how well individual agencies within a community coalition support the delivery of chosen interventions from the Triple P—Positive Parenting Program System of Interventions.

The Implementation Drivers Assessment for the Triple P System of Interventions (**IDA**) includes eight indices, each covering a different topic related to implementation infrastructure and best practices. These scores are meant to be used for action planning and may develop or regress over time.

IDA Index Descriptions

Agency Implementation Capacity (AIC)

The agency has formally and sustainably organized and aligned leadership and team-based staff support with the authority, capacity, and abilities to coordinate and support day-to-day Triple P implementation activities within the agency. **32 points possible.**

Recruitment & Selection (RS)

The agency uses best practices for the recruitment and/or selection of practitioners to deliver Triple P to the agency's target population. **20 points possible**

Training (T)

The agency uses best practices for training Triple P practitioners to deliver Triple P to the agency's target population. **22 points possible**

Coaching (C)

The agency uses best practices for coaching Triple P practitioners as they deliver Triple P interventions to children and families. **20 points possible**

Fidelity Assessment (FID)

The agency uses best practices for assessing whether or not core Triple P components are delivered as intended by Triple P practitioners to children and families. **16 points possible**

IDA Scoring

Each item is scored through modified consensus of simultaneous public polling results. Participants individually decide how well the item is reflected in their organization.

No or Not in Place (0): No activities or elements of this item are in place and/or have not yet been initiated.

Sometimes or Partially in Place (1): Some activities or elements of this item are in place and/or initiated.

Yes or Fully in Place (2): All activities or elements of the item are adhered to, with clear supporting evidence.

Decision-Support Data System (DSDS)

The agency uses best practices to gather, use, and share implementation and intervention data for decision-making to improve the implementation of Triple P within the agency. **28 points possible**

Facilitative Administration (FAC)

The agency uses best practices to solicit, document, and use information about agency policy and practice facilitators and barriers to improve the implementation of Triple P within the agency. **20 points possible**

Systems Interventions (SI)

The agency uses best practices to solicit, document, and use information about Triple P successes and larger systems needs to improve and sustain the implementation of Triple P within the agency. Additionally, the agency participates in key Triple P system activities, including the Triple P Stay Positive media campaign and community referral networks. **28 points possible**

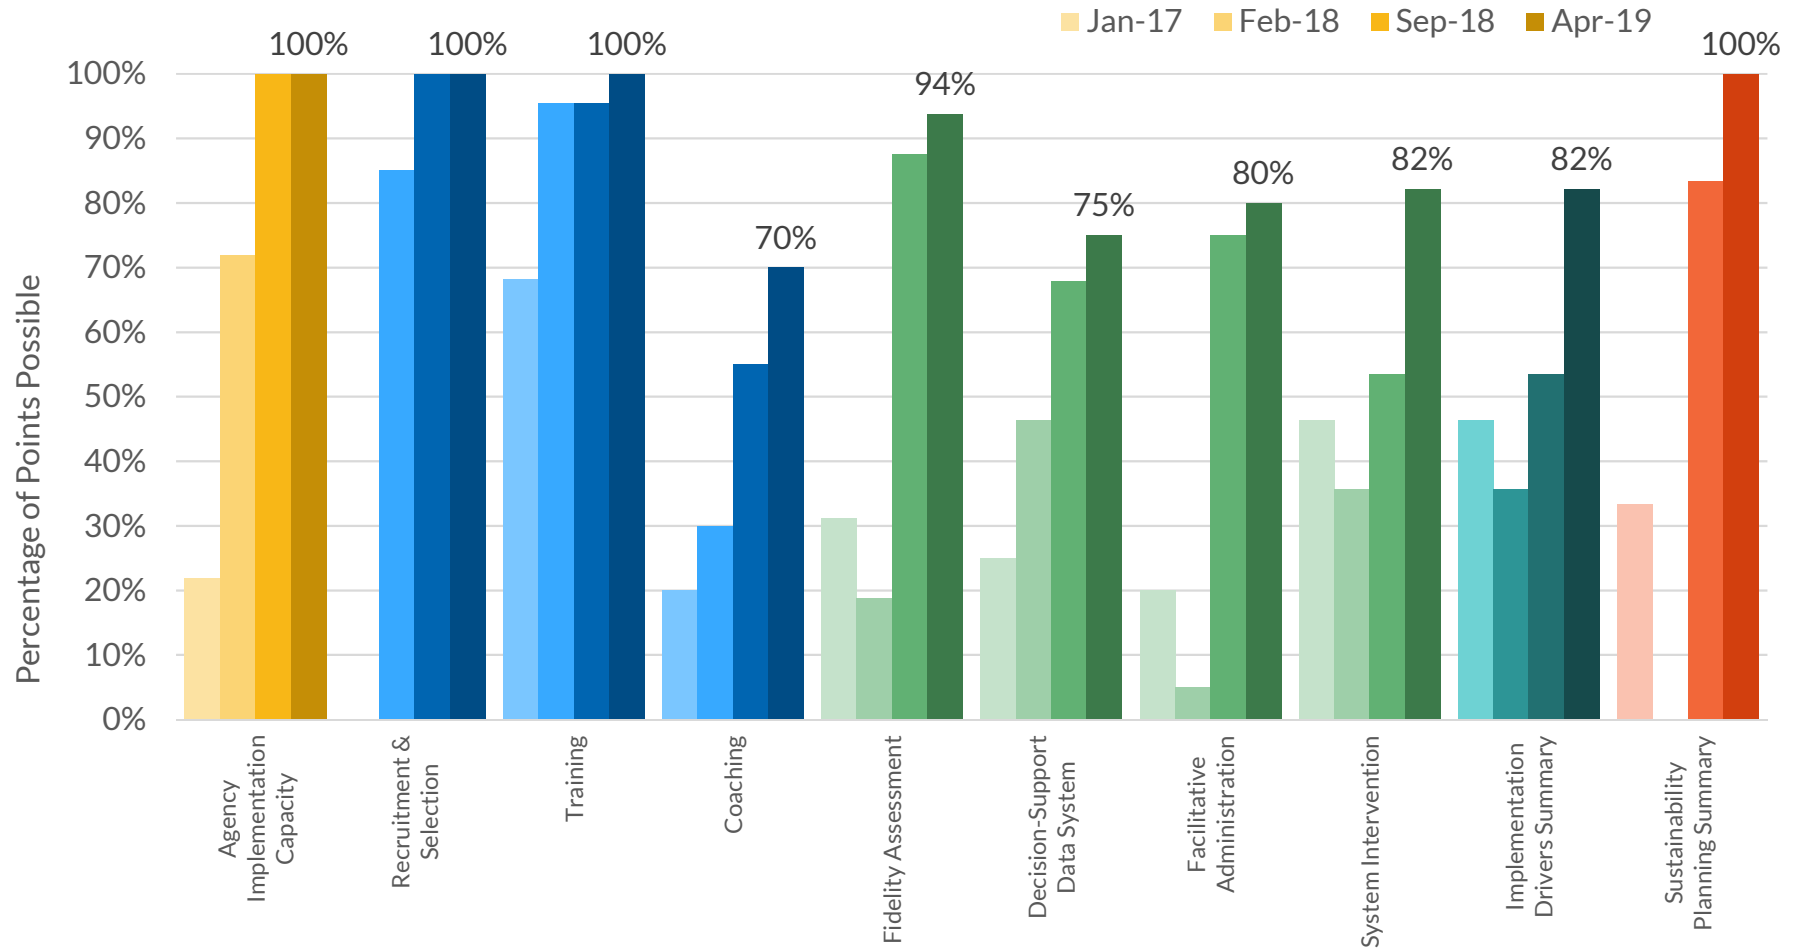

Agency Implementation Drivers Summary

This summary index provides aggregate information about all items in the RS, T, C, FID, DSDS, FAC, and SI indices. It represents the aggregate of agency implementation infrastructure and best practices to support the delivery of Triple P as intended. **154 points possible**

Agency Sustainability Planning Summary

This summary index provides aggregate information about AIC4, AIC16, and SI14. It represents the aggregate of agency sustainability planning related to the implementation of Triple P. **6 points possible**

IDA Index Scores At-A-Glance Summary Chart

Scoring Interpretation Notes:

Scores are meant to be used for action planning and may develop or regress over time.

Indices that are 70-80% in place are considered good and over 80% are considered strong.
